---

PROFESSIONAL SUMMARY:

Detail-oriented Frontend Developer and Computer Science undergraduate with over 3 years of experience building responsive, pixel-perfect web interfaces. Proficient in the React ecosystem (Next.js, Tailwind CSS) with a strong background in graphic design that ensures seamless design-to-code implementation. Passionate about performance optimization, accessibility, and creating intuitive user experiences.

TECHNICAL SKILLS

- **Core Frontend:** JavaScript (ES6+), React.js, Next.js, HTML5, CSS3, DOM Manipulation.
- **Styling & UI:** Tailwind CSS, Bootstrap, Responsive Web Design, Mobile-First Architecture.
- **Design & Tools:** Figma (Prototyping & Handoff), Git/GitHub, Canva, Affinity.
- **Basic Understanding:** Node.js, MongoDB, Python, C (Backend concepts & API integration).

EXPERIENCE

Fullstature Missions International | *Web Developer & Lead Designer May 2023 – Present*

- **Frontend Architecture:** Developed the official conference website [(AWMC)](AWMC)(click to view) using HTML, CSS, TailwindCSS and JavaScript, ensuring cross-browser compatibility and mobile responsiveness.

- **UI/UX Design:** Spearheaded the visual identity for digital campaigns, designing over 150 assets and ensuring brand consistency across web platforms.
- **Maintenance:** Regularly audit and update web content to maintain 99.9% uptime during peak event traffic.

Freelance | *Frontend Web Developer Sept 2020 – Present*

- **Client Solutions:** Delivered custom frontend solutions for diverse clients, translating requirements into functional, interactive user interfaces.
- **NGO Platform:** Built the donation-ready website for *[SavingBridge Global Care Foundation](#)* (click to view), utilizing WordPress and custom CSS to optimize the donor user journey.
- **Landing Pages:** Developed a high-conversion landing page for *[Gap Tutorials](#)*, featuring seamless integration with Selar for digital product sales.

Giving Aid International Network (GAIN) | *Volunteer Web Tutor Oct 2024*

- Mentored 20 government secondary school students in the fundamentals of web design and development using WordPress.com, fostering the next generation of web development talent.

KEY PROJECTS

Corolla Model Private School Portal

- *Tech Stack*: React.js, Sass, Tailwind CSS
- Designed and built a modern, multi-page frontend for a primary school, focusing on accessible navigation and fast load times for parents and staff.

Abasio Scientific Calculator

- *Tech Stack*: JavaScript (Vanilla), HTML5, CSS3
- Engineered a fully functional scientific calculator, implementing complex arithmetic logic and event handling without reliance on external frameworks.

Mustergate Organization Site

- *Tech Stack:* HTML, CSS, JavaScript
- Developed a corporate brochure website, focusing on clean typography and semantic HTML structure for improved SEO.

EDUCATION

University of Lagos (Unilag) | *Lagos, Nigeria Bachelor of Science in Computer Science* | *2024 – Present*
